

TAG NG Inflatable Tents

The TAG NG tent is ready for use in just minutes thanks to its inflatable frame.

The speed and ease of deployment make the TAG NG ideal for emergency care, command posts and emergency shelters for example.

Its resistance and robust construction, along with a set of accessories, ensures the TAG NG 's efficient use on any type of terrain.

All tents can be carried by hand to the place of use.

One or two persons using an electric inflator install the inflatable TAG NG tent in less than 5 minutes.

Thanks to their modular design, the tents can be connected to each other in any direction (gable doors and side doors).

The tent is made of durable, fire and UV resistant PVC coated fabric, using HF welding to construct the cover and floor into one enclosure.

Worldwide service and assistance are provided by our specialised technicians.

Available accessories:

- Automatic pressure maintenance system
- Internal wall partition
- Internal liner
- Sunscreen
- Electric inflator
- Protective groundsheet
- Lighting
- Power distribution box
- Heating / AC
